I think it is time to put this Microsoft case behind us. It is so obvious to me that Microsofts competitors are pushing to keep it going. AOL should be put under the microscope Hummmm. What would we find there ...? If it wernt for Microsoft I wouldn t be typing this right now. Microsoft has hepled far more people in the learning of computers than any other company. Let s save a little of the TAX Payers TAX money and close this case. The Government has allready spent far to much on this case. Thank You
